

C2B2 Colorado Center for Biorefining and Biofuels

Postdoctoral Fellowship Program

The Colorado Center for Biorefining and Biofuels (C2B2) is pleased to announce the second annual Postdoctoral Fellows Program. This program aims to attract the best early-career researchers from around the world to focus on fundamental scientific challenges across the broad range of disciplines relevant to the renewable energy industry. Research disciplines include plant biotechnology, biochemical and thermochemical conversion technologies, as well as process, product, and systems engineering.

Fellows will be funded at \$65,000 per year in direct costs, which includes stipend, supplies, and travel costs. C2B2 invites applicants throughout all relevant disciplines to apply. Candidates must be sponsored by a C2B2 PI in order to submit the online application. Although, applications will be accepted on an ongoing basis, **application review will begin on May 1, 2009** and will continue until all positions are filled. Full application instructions can be found at www.c2b2web.org.

The Colorado Center for Biorefining and Biofuels (C2B2) combines the expertise of more than 100 principal investigators at the University of Colorado, Colorado State University, Colorado School of Mines, and the National Renewable Energy Laboratory, in addition to the insight of over twenty (20) industrial sponsors for the purpose of advancing research, training, innovation and commercialization in the field of biorefining and biofuels. C2B2 has the largest number of industrial sponsors of any biofuels research center in the world; membership includes global chemical and energy industry leaders, as well as startup companies seeking to commercialize cutting-edge science and technology.

C2B2 is committed to diversity and equality in education and employment. Any offer of employment is contingent upon the satisfactory completion of a criminal background check.
