January 22, 2009

Trey Rogers
A 160 Plant & Soil Sciences Bldg.
East Lansing, MI 48824-1325

Dear Mr. Rogers:

It would be much appreciated if you could inform your students that The Broadmoor Golf Club has golf course maintenance internships available for the 2009 summer golf season. The Broadmoor is located in Colorado Springs, CO. We have three championship golf courses and will host three interns per course.

The Broadmoor is a world-class resort which opened in 1918. It is one of the few resorts in the country to have earned the Mobil Five-Star and AAA Five Diamond ratings every year since the awards were established. The golf courses were recently recognized by *Golf Digest Magazine* as the ninth rated golf resort in the country and are continually ranked in the Top 100 Courses You Can Play by both *Golf Digest* and *Golf Magazine*.

In 2008 the East course hosted the U.S. Senior Open Championship and in 2011 will host the U.S. Women's Open. Turfgrass management interns will gain valuable experience learning how a course is prepared for a USGA national championship. The Mountain course opened in July 2006 and was designed by Nicklaus Design. The West course has been the previous site of two USGA championships and is currently undergoing a three million dollar renovation including work on bunkers, tees, greens, and water features.

In addition to learning all facets of golf course maintenance, students will be able learn the business aspects of a resort golf operation and the ultimate training in customer service. These additional opportunities will greatly benefit students entering the highly competitive turfgrass industry.

Thank you for your time. Interested students can forward a resume or directly contact our golf maintenance department.

Sincerely,

Fred E. Dickman CGCS
Director Golf Course Maintenance
