

**Summer Intern
Park Meadows Country Club
Park City, UT**

Park Meadows Country Club is located in the mountain community of Park City just minutes from down town. This is an opportunity for someone to learn how to manage a high end golf course and be able to enjoy an outdoor life style.

Interns will be involved in all aspects of golf course management, including chemical and fertilizer applications, course set up, irrigation auditing and maintenance, mowing operations, and supervision of crew members for special projects.

Park Meadows just finished a renovation in the fall of 08. We will need help with getting all our new greens consistent and ready for play this spring. This renovation included 22 A4 bent grass greens, completely new irrigation, all new bunkers; an extensive drainage system was installed through out the property a new practice facility, and some new tee boxes.
